TECHNICAL EXPERIENCE

Art Lister - *It maintains a list of artworks you have seen or plan on seeing in the future.*

- + Designed custom services that uses \$http requests to send and retrieve data from the Rails Backend
- + Included Angular's Ui-Router dependency to create a dynamic view with nested states
- + Built forms using ng-message to display validation errors
- + Added search fields so users can filter data by selecting specific criterias (ex: artist name)

Recipe Manager - *It is a content management system that organizes your recipes.*

- + Translated JSON responses from AJAX requests into Javascript Model Objects
- + Implemented Handlebars templates and jQuery to display Javascript Model Objects
- + Used OmniAuth for Oauth authentication with Facebook

Tic Tac Toe - *It is a game where users can play tic tac toe.*

- + Used AJAX requests to persist, update, and switch tic tac toe games from database
- + Combined JavaScript functions and jQuery to display correctly placed 'X' and 'O' tokens from a saved game
- + Created JavaScript functions to display specific messages for a winner or draw

Flatiron Store Project - *It is an e-commerce website where users can put items in their cart and buy them.*

- + Included Devise gem to set up user signup and login
- + Built API using Ruby on Rails and the MVC pattern
- + Designed the database schema and configured ActiveRecord associations

Regal Now Playing CLI Gem - *It is a ruby gem that scrapes movie info from a movie theater in Duluth, GA.*

- + Used Nokogiri to scrape movie titles, ratings, genres, and times from Regal Medlock Crossing Stadium 18 & RPX website
- + Created an object oriented ruby application to display scraped movie titles for a user to select from
- + Designed a Command Line Interface so a user can find information pertaining to different movies
